

I hate the thought that lobbyists are trying to take away a valueable service that I have been paying to have an use. As a person who travels a lot, this service has come in as a life saving tool when I found myself traveling in an area that I was not familiar with and did not know what radio station covered that area. This service helped me manage to avoid a tornado that was crossing in my path. I think it is my right to pay for a service that could benefit me in that form. I do not think that regulators should have the right to take these options away from me. The National Association of Broadcasters should not be allowed to take this from me if I choose to pay for this service. Respectfully I urge the FCC to reject the NAB's petition 04-160 and to support XM's ability to provide the kind of programming that I demand and deserve.
